

DEVARAJ S

Full Stack Developer | MERN Stack | Next.js | Flutter | AWS

 Portfolio  LinkedIn  GitHub  devarajsubramani20@gmail.com  +91 9894880175

PROFESSIONAL SUMMARY

Full Stack Developer specializing in the **MERN stack** (MongoDB, Express.js, React.js, Node.js) with hands-on experience building, testing, and deploying scalable web applications using **TypeScript**, **RESTful API design**, and **JWT authentication**.

Proficient in **Docker** containerization, **CI/CD pipelines** via GitHub Actions, and cloud deployments on **AWS** (EC2, S3, Lambda), focused on solving real-world problems through clean, efficient, and maintainable code.

TECHNICAL SKILLS

Languages	Java, C, SQL, JavaScript, Python
Frontend	React.js, HTML5, CSS3, REST API Integration
Backend	Node.js, Express.js, Next.js, FastAPI, RESTful API Design, JWT Authentication
Mobile	Flutter, Dart, React Native
Databases	MongoDB, MySQL, Supabase
Cloud & DevOps	AWS (EC2, S3, Lambda), Docker, CI/CD Pipelines, GitHub Actions, Linux
Tools & Version Control	Git, GitHub, Postman, VS Code, LM Studio

EDUCATION

2023–2027	Bachelor of Engineering, Computer Science and Engineering	CGPA: 8.01
	Dr. N.G.P. Institute of Technology, Coimbatore	

WORK EXPERIENCE

Software Development Intern	<i>SkyLena Info Technology Pvt. Ltd. June 2025 – July 2025</i>
- Engineered QuickBuy, a full-stack e-commerce web application with product browsing, cart management, and end-to-end order flow using HTML5, CSS3, and JavaScript, reducing manual shopping workflow by over 60%. - Built responsive UI components with cross-browser compatible layouts, improving interface accessibility, and tested functionality using Postman for API validation.	

TECHNICAL PROJECTS

The Smart ATM — Cardless Cash Withdrawal System 	<i>React.js, Node.js, Express.js, MongoDB, Twilio API, JWT</i>
- Architected a secure full-stack banking web application enabling cardless withdrawals via OTP-based two-factor authentication, integrating Twilio REST API for real-time SMS delivery across 1,000+ simulated transactions. - Designed a RESTful API backend with Node.js/Express.js and MongoDB schema design, enforcing transaction limits, JWT session management, multi-step OTP verification, and input sanitization for web security.	
SmartEco — AI-Driven Campus Resource Optimizer 	<i>React.js, FastAPI, Python, Random Forest, REST API</i>
- Built a full-stack sustainability platform with a React.js frontend consuming a Python FastAPI REST API, integrating a Random Forest ML model achieving 87% prediction accuracy for campus resource consumption. - Engineered a real-time environmental monitoring dashboard with dynamic data visualization, cutting manual resource audit time by 40% for campus administrators and reducing reporting overhead.	
StudentBuddy — AI-Powered Smart Mentoring Platform 	<i>Dart, Flutter, Android Studio, Node.js, Supabase, LLM Integration, JWT</i>
- Developed a full-stack mentoring platform with a React.js + TypeScript frontend and Supabase (PostgreSQL) backend, enabling real-time one-to-one messaging, unit tested and validated with 40+ live users. - Integrated a locally hosted LLM (via LM Studio) as an AI chatbot for context-aware academic responses, implementing a privacy-first architecture that keeps all data on-premise with zero external API calls. - Designed a RESTful API with Node.js enforcing JWT authentication, multi-role access control (student / mentor / admin), database schema design for user relationships, and persistent session management.	

CERTIFICATIONS

- Generative AI: Working with Large Language Models** – May 2026
- Cloud Computing** – NPTEL, 2024
- Industrial IoT** – NPTEL, 2025

LANGUAGES

English – Professional Working Proficiency
Tamil – Native
