ABOUT ME

Final-year Computer Science Engineering student specialising in **AI/ML Engineering** with hands-on experience in computer vision, deep learning, NLP, and full-stack AI development. Passionate about building intelligent, production-ready systems that solve real-world problems at scale. Seeking an **AI/ML Engineer** or **Data Science** role to contribute to impactful, data-driven products.

EDUCATION

Dr. N.G.P. Institute of Technology — Coimbatore, India 2023 – 2027 (Pursuing)
B.E. Computer Science and Engineering CGPA: 8.14 / 10

TECHNICAL SKILLS

Languages	Java, Python, SQL
AI & ML	Pandas, NumPy, NLP, LLM, RAG Systems, Prompt Engineering
MLOps	Streamlit, Google Colab, Jupyter, Git & GitHub, VS Code
Web	React.js, FastAPI, HTML5, CSS3, JavaScript
Database	MySQL, MongoDB

PROJECTS

Andrick AI — Self-Learning Personal Knowledge Assistant *[RAG · NLP · LLM]* Jun 2026 – Present
<https://github.com/renishandrick/andrick-ai> *Python · LangChain · FAISS · Ollama · Qwen3 · TensorFlow · SpaCy · SQLite · Streamlit*

- Built a **privacy-first RAG assistant** using **LangChain** + **FAISS** vector indexing with Hugging Face sentence embeddings, enabling natural-language querying over PDFs, DOCX, code repos, and notes — runs fully offline via **Ollama** + **Qwen3**.
- Engineered a **TensorFlow** personalisation engine that learns from user activity and document history to surface intelligent recommendations; conversation memory persisted via **SQLite**.
- Built a real-time **Streamlit** UI with live document indexing, semantic search, and conversational retrieval; **SpaCy** handles entity extraction and query understanding over uploaded knowledge bases.

ATM Security Surveillance System *[Computer Vision · Object Detection · Deep Learning]* Aug 2024 – Nov 2024
<https://github.com/renishandrick/Atm-security> *Python · YOLOv8 · PyTorch · OpenCV · NumPy*

- Trained a custom **YOLOv8** model on **20,000+ annotated images** to detect helmets, face masks, and suspicious behaviour in live ATM feeds; achieved **mAP@0.5 = 91.4%** on the held-out test split.
- Optimised an **OpenCV** pipeline for real-time inference at **24 FPS** on standard GPU hardware; integrated automated alerts on threat detections, reducing manual monitoring effort by **60%**.

SmartEco — AI-Driven Campus Resource Optimizer *[Anomaly Detection · Full-Stack · IoT]* Mar 2024 – Jun 2024
<https://github.com/renishandrick/smarteco> *React.js · Python · FastAPI · Random Forest · Scikit-learn*

- Trained a **Random Forest** anomaly-detection model achieving **88% accuracy** and **0.91 F1 score** on labelled consumption data; model flags abnormal usage in real time across **12+ campus zones**.
- Developed a full-stack platform with a **React.js** dashboard and a **FastAPI** backend serving ML inference via REST APIs, enabling facility managers to act on anomalies within minutes.

WORK EXPERIENCE

Sky Lena InfoTechnology Pvt. Ltd., Remote Full Stack Development Intern · Jun 2024 – Aug 2024

- Developed full-stack web applications using **React.js**, **Node.js**, **Express.js**, and **MySQL**, building responsive UIs and RESTful APIs.
- Implemented authentication, CRUD operations, and database integrations; optimised frontend performance and contributed to deployment of scalable web solutions.

CERTIFICATIONS, ACHIEVEMENTS & LANGUAGES

- Industrial Internet of Things (IIoT)** — NPTEL December 2025
- Machine Learning** — Python for Data Science, LinkedIn Learning
- Seminars: *Missile Navigation & Control using AI* | *In-Vehicle Intrusion Detection System* | **GitHub Copilot Workshop**

- **Languages:** English (Professional) | Hindi (Conversational) | Tamil (Native)
