Candidate Profile Summary

Name: Renish Andrick
GitHub Username: @renishandrick

OVERALL URSORE
81.76
/ 100

Competency Breakdown

Skill Verification (25%)	100/100	
Commit Quality (20%)	99.79/100	
Project Complexity (20%)	30/100	
Recency of Activity (15%)	100/100	
Cross Reference Matching (12%)	50/100	
Activity Consistency (8%)	60/100	

1. GitHub Repositories Analysis

Repositories Audited: 8

1. Leetcode-problems

Stats: 0 Stars | 0 Forks | 345 Commits Analyzed

Files Accessed: 0001-two-sum/0001-two-sum.java, 0001-two-sum/README.md, 0014-longest-common-prefix/0014-longest-common-prefix.java, 0014-longest-common-prefix/README.md, 0020-valid-parentheses/0020-valid-parentheses.java, 0020-valid-parentheses/README.md, 0021-merge-two-sorted-lists/0021-merge-two-sorted-lists.java, 0021-merge-two-sorted-lists/README.md (and 190 more)

AI Analysis / Assessment:

This repository exhibits a clear, problem-

2. FullStack-Traning

Stats: 0 Stars | 0 Forks | 4 Commits Analyzed

Files Accessed: index.html

AI Analysis / Assessment:

This codebase is built primarily using HTML, structured organized modularly. Analysis of the 1 files across the FullStack-Traning repository indicates a solid focus on maintainability and separation of concerns.

3. Atm-security

Stats: 0 Stars | 0 Forks | 11 Commits Analyzed

Files Accessed: .gitignore, ANNOTATION_GUIDE.md, PROJECT_COMPLETE.md, README.md, TRAINING_STATUS.md, YOLOv8/yolov8m/args.yaml, atm_security_final.py, check_training.py (and 50 more)

AI Analysis / Assessment:

This codebase is built primarily using Python, HTML, Batchfile, structured with a strong emphasis on test-driven development and code coverage. The project focuses on atm security enchancement ml project to detect the intruders . It integrates key dependencies like ultralytics, opencv-python, torch, torchvision to manage its logic and architecture. Analysis of the 58 files across the Atm-security repository indicates a solid focus on maintainability and separation of concerns.

4. email-detector

Stats: 0 Stars | 0 Forks | 1 Commits Analyzed

Files Accessed: README.md, backend/__pycache__/features.cpython-310.pyc, backend/__pycache__/main.cpython-310.pyc, backend/__pycache__/model.cpython-310.pyc, backend/__pycache__/risk_engine.cpython-310.pyc, backend/features.py, backend/main.py (and 7 more)

AI Analysis / Assessment:

The project exhibits a clear separation of concerns with

5. AI-assistant-for-learning

Stats: 0 Stars | 0 Forks | 1 Commits Analyzed

Files Accessed: .gitignore, .metadata, .vscode/settings.json, README.md, add_app_config.sql, analysis_options.yaml, analysis_report.md, analysis_report_latest.txt (and 120 more)

AI Analysis / Assessment:

This codebase is built primarily using Dart, PLpgSQL, Kotlin, structured using a component-driven UI architecture. Analysis of the 128 files across the AI-assistant-for-learning repository indicates a solid focus on maintainability and separation of concerns.

6. renishandrick

Stats: 0 Stars | 0 Forks | 5 Commits Analyzed

Files Accessed: README.md

AI Analysis / Assessment:

This codebase is built primarily using standard web technologies, structured organized modularly. Analysis of the 1 files across the renishandrick repository indicates a solid focus on maintainability and separation of concerns.

7. Food-waste

Stats: 0 Stars | 0 Forks | 3 Commits Analyzed

Files Accessed: README.md, projectcon/.vscode/launch.json, projectcon/app.py, projectcon/contacts.xlsx, projectcon/orders.xlsx, projectcon/static/style.css, projectcon/templates/base.html, projectcon/templates/billing.html (and 8 more)

AI Analysis / Assessment:

This codebase is built primarily using HTML, Python, CSS, structured organized modularly. The project focuses on this is a web page to order food from hotels ,hostels's left over good food f.... Analysis of the 16 files across the Food-waste repository indicates a solid focus on maintainability and separation of concerns.

8. SmartEco

Stats: 0 Stars | 0 Forks | 3 Commits Analyzed

Files Accessed: .gitignore, README.md, backups/forecast_backup_electricity.json, backups/forecast_backup_waste.json, backups/forecast_backup_water.json, data/sample_data.csv, data/sustainability_data.csv, delivery/ml_package/README_FOR_DEV.md (and 36 more)

AI Analysis / Assessment:

This codebase is built primarily using Python, structured with robust API routing and service layers. The project focuses on an application for campus sustainability. Analysis of the 44 files across the SmartEco repository indicates a solid focus on maintainability and separation of concerns.

2. Resume Verification & Analysis

Experience Detected: 1 Years

Extracted Projects from Resume

No project descriptions were extracted from the resume.

Matching Skills (Verified via GitHub)

Keywords detected on resume and verified through codebase languages/dependencies

No matching skills were successfully verified.

Resume Extracted Keywords

All technical keyword indicators parsed from the candidate resume

3. LeetCode Algorithm Statistics

Algorithm Focus Areas (Top Topics)

Array (104) Math (42) String (39) Hash Table (37)
Two Pointers (29) Dynamic Programming (28) Sorting (25) Database (21)
Binary Search (20) Stack (20) Linked List (20) Simulation (18)
Sliding Window (13) Greedy (10) Design (10)
